

Job Title: Environment, Health & Safety Manager
Experience: 5+ years EHS experience in a chemical environment

At Chemetry, we are guided by our view that everything starts with safety. We're hiring an EHS professional committed to supporting this principle. To apply, please send your résumé and cover letter to jobs@chemetrycorp.com.

Company Overview:

Chemetry (www.chemetrycorp.com) pioneered a new platform, eShuttle™, to produce a range of industrial chemical products at lower energy demand and cost than conventional production methods. We operate laboratory and pilot plant facilities in Moss Landing, California, to further develop our technology platform.

Job Scope:

The Environment, Health & Safety Manager researches, develops, plans, implements and monitors EHS activities and programs to support laboratory and around the clock pilot plant operations.

Duties and Responsibilities:

- Maintain compliance with all federal, California and local health and safety regulations including regulatory reporting, permitting and audits
- Conduct EHS training and new hire orientation
- Maintain HAZWOPER preparedness with response exercise drills
- Manage injury and illness prevention and hazard communication programs
- Facilitate hazard assessments, incident investigations and hazard correction activities
- Manage waste storage, transportation, disposal and recycling programs
- Coordinate air emission, wastewater, storm water and water testing
- Develop EHS documentation packages to share with commercialization partners
- Support EHS activities at new plant sites
- Manage workers compensation from initial injury report to employee return and claim closure
- Lead safety committee meetings

Required Qualifications:

- Bachelor's degree in Environmental, Safety, Engineering, Science or related field
- Minimum of 5 years of safety, environmental, engineering or related experience in a chemical plant or R&D center environment
- Strong understanding of federal, California and local regulations and requirements
- Flexibility to work outside of normal or routine work hours as required
- 40-hour HAZWOPER certification and 8-hour annual refresher training
- Effective written and verbal communication skills
- Highly collaborative spirit with strong team and interpersonal skills and ability to work effectively with all levels of the organization.
- Strong leadership, analytical and problem solving skills
- Proficient use of Microsoft Office Suite
