Job Title: Chemical Process Operator

Location: Moss Landing, CA

Company Overview:

The Chemetry team is a dedicated and innovative group of forward thinkers excited to redefine how chemicals are made. Chemetry pioneered the eShuttle™ platform that enables the production of a wide range of industrial chemicals with increased safety, reduced energy demand and reduced environmental impacts as compared to conventional production processes. Chemetry operates laboratory and pilot plant facilities in Moss Landing, California. We are looking for highly qualified and dedicated operators interested in developing the next generation of chemicals while working at a state of the art pilot plant facility.

Job Scope:

The Process Operator safely operates and maintains the pilot plant to demonstrate and optimize the eShuttle™ platform. The position requires work shift flexibility with a 24 hour operation, ability to make intelligent process decisions, and maintain safe work practices at all times.

Responsibilities:

- Comply with environmental, health and safety standards
- Effectively work in a team environment to safely operate and maintain plant equipment
- Perform and follow all preventative maintenance schedules
- Perform all tasks assigned to the Operations department including and not limited to; housekeeping, reporting of spills or dangerous conditions, waste management
- Monitor process controls, troubleshoot, identify, and resolve potential hazards
- Develop expertise in the Chemetry process
- Measure and collect appropriate material while maintaining all inventory controls
- Obtain and process chemical samples
- Implement plant design improvements

Qualifications:

- Associate's degree, Trade School, 2+ years in industrial operations or manufacturing setting
- Health, safety, and environmental conscious
- Experience with construction tools, rigging, calibration techniques, instruments, and inspections
- Highly collaborative spirit with strong team and interpersonal skills
- Must be able to meet the physical demands of the job as follows:
 - o Use safety equipment that is rated for a person who weighs 300 pounds or less.
 - o Lift 55 lbs, climb stairs and ladders
 - o Work in confined spaces
 - o Wear all required personal protective equipment including full face respirators and SCBA equipment (no facial hair allowed)
 - o Stand 70% of the time
